

ORBCOMM Recognized by the American Business Awards With Gold Stevie® for Its Intermodal Container Telematics Solution

June 24, 2019

Honored for its accomplishments in technology innovation in the new transportation products category

ROCHELLE PARK, N.J., June 24, 2019 (GLOBE NEWSWIRE) -- ORBCOMM Inc. (Nasdaq: ORBC), a global provider of Machine-to-Machine (M2M) and Internet of Things (IoT) solutions, today announced that its intermodal [container telematics](#) solution, the [CT 3000](#), has been recognized by the 17th Annual American Business Awards (ABA) with a 2019 Gold Stevie® Award in the New Transportation Products category. The winners were announced on June 11 at a gala banquet at the Marriott Marquis Hotel in New York City, NY. ORBCOMM's CT 3000 also recently earned the 2019 IoT Innovations Award from *Connected World* magazine as well as the 2019 Industrial IoT Product of the Year Award from *IoT Evolution World* magazine.

ORBCOMM's CT 3000 provides [remote monitoring and control of refrigerated containers](#) travelling by land, rail or sea for uninterrupted visibility of operations, improved efficiency and reduced costs. The CT 3000 connects directly to the reefer to enable real-time alerts and two-way control, allowing operators to quickly react to discrepancies and remotely adjust temperature and humidity levels to ensure temperature compliance and minimize spoilage, thereby reducing costly insurance claims. By leveraging comprehensive data logs to efficiently allocate assets, operators can also eliminate unnecessary moves, improve turn times and streamline delivery and routes.

"We're honored to be recognized by the ABA with a Gold Stevie award for our leadership and technology innovation represented by our new container telematics solution, which helps intermodal operators increase asset utilization, lower operating costs and ensure container temperature compliance," said Craig Malone, ORBCOMM's Executive Vice President of Product Development. "We're committed to continue helping our customers achieve the highest levels of efficiency and customer service by developing products and services that leverage our best-in-class IoT technology."
