

## ORBCOMM ANNOUNCES LAUNCH WINDOW FOR SECOND OG2 MISSION

*Eleven OG2 satellites to launch from Cape Canaveral aboard dedicated SpaceX Falcon 9 rocket to complete next generation constellation*

**Rochelle Park, NJ, October 16, 2015** – ORBCOMM Inc. (Nasdaq: ORBC), a global provider of Machine-to-Machine (M2M) and Internet of Things (IoT) solutions, today announced that ORBCOMM and SpaceX plan to launch eleven OG2 satellites from Cape Canaveral Air Force Station in Florida on the next launch of the SpaceX Falcon 9 rocket targeted to take place in the next six to eight weeks.

SpaceX successfully launched [ORBCOMM's first OG2 mission](#) of six satellites on July 14, 2014. This next dedicated launch will mark ORBCOMM's second and final OG2 mission, completing its next generation satellite constellation.

“We are excited to launch our eleven OG2 satellites aboard SpaceX's newly upgraded Falcon 9 rocket and have full confidence in SpaceX and their dedication to this launch,” said Marc Eisenberg, ORBCOMM's Chief Executive Officer. “We look forward to completing the deployment of our next generation constellation and delivering a higher level of performance, coverage and reliability through our modernized and upgraded OG2 network to our customers around the world.”

Sierra Nevada Corporation, the prime contractor and spacecraft bus manufacturer for ORBCOMM's OG2 satellites, has completed all factory acceptance testing and is preparing the satellites for shipping to Cape Canaveral at the end of October.

[ORBCOMM's OG2 satellites](#) are far more advanced than its current OG1 satellites and are designed to provide customers with significant enhancements, such as faster message delivery, larger message sizes and better coverage at higher latitudes, while drastically increasing network capacity. In addition, the OG2 satellites are equipped with an [Automatic Identification System \(AIS\)](#) payload to receive and report transmissions from AIS-equipped vessels for ship tracking and other maritime navigational and safety efforts, increasing asset visibility and the probability of detection for ORBCOMM's AIS customers.

### **About ORBCOMM Inc.**

ORBCOMM Inc. (Nasdaq: ORBC) is a leading global provider of [Machine-to-Machine \(M2M\) communication](#) solutions and the only commercial satellite network dedicated to M2M. ORBCOMM's unique combination of global satellite, cellular and dual-mode network connectivity, hardware, web reporting applications and software is the M2M industry's most complete service offering. Our solutions are designed to remotely track, monitor, and control fixed and mobile assets in core vertical markets including transportation & distribution, heavy equipment, industrial fixed assets, oil & gas, maritime, mining and government.

With nearly 20 years of innovation and expertise in M2M, ORBCOMM has more than 1.3 million subscribers with a diverse customer base including premier OEMs such as Caterpillar Inc., Doosan Infracore America, Hitachi Construction Machinery Co., Ltd., John Deere, Komatsu Ltd., and Volvo Construction Equipment, as well as end-to-end solutions customers such as C&S Wholesale, Canadian National Railways, CR England, Hub Group, KLLM Transport Services, Marten Transport, Swift Transportation, Target, Tropicana, Tyson Foods, Walmart and Werner Enterprises.
